Online 40 Hour Hazwoper Training

National Environmental Trainers® (NET) offers the highest quality available in online HAZWOPER refresher and 40 Hour HAZWOPER Training and certification. We are specialists and experts with many years experience in this field. Our site contains a comprehensive catalog of OSHA courses for online safety training. We have trained thousands of professionals with our courses, including state and federal regulators. If you are looking for an OSHA compliance source that provides excellent education along with tremendous service for safety training, you are in the right place. We also offer OSHA 40 courses, Resources Conservation and Recovery Act (RCRA), DOT and environmental training. We have in-house subject matter experts who authored these courses and are available 24/7 to answer questions or provide guidance. Because HAZWOPER work is considered to be one of America's most hazardous occupations, you can feel comfortable knowing that subject matter experts help explain the fundamentals in clear terms. Our team developed the HAZWOPER Hands-on Simulator® that is considered the industry standard for online HAZWOPER training.

At NET, we are the original provider of online HAZWOPER certification, HAZMAT certification and 40 hour HAZWOPER training. In 1996, we published the first online refresher course on the Internet. Today, we are the leading course provider. Contact us for more information about our classes on RCRA training, DOT training and OSHA compliance.

40 Hour HAZWOPER

Cost: $395.00 per person - Price Match Guarantee

Take the web's premiere 40 hour HAZWOPER course - featuring the OSHA accepted HAZWOPER Hands-on Simulator. Group discounts available

Price Match Guarantee. We will match a competitors price for the same course even though the quality of the course may be vastly different.

View HAZWOPER Hands-on Simulator Demo

Price Match Guarantee. We will match a competitors price for the same course even though the quality of the course may be vastly different. The price match is only valid for companies who offer OSHA compliant HAZWOPER training. (Recently, OSHA has revoked the Outreach Training authorization from some companies).

Are you recieving credible training? You may find less expensive online courses but they cannot fulfill the OSHA 40 Hour HAZWOPER hands-on requirement without a simulator or other means. We are the only company today with an OSHA accepted online simulator. Course includes Free Study Guide! Buy today with confidence! We also offer U.S. Based support 24/7. Download OSHA Acceptance Letter

The course is now offered in 2 great formats (Classic and Enhanced). The Classic format is the format we have used over the years. The Enhanced format incorporates many of the latest online training components.

Assurance of OSHA HAZWOPER Compliance

We also offer the added assurance that our course complies with the OSHA regulations. We have an interpretation letter from the U.S. OSHA Directorate of Enforcement Programs in Washington D.C., accepting our HAZWOPER Hands-on Simulator.No other online company has such a letter from OSHA. So, for almost the same price as other companies that provide no assurance, you also receive added assurance from us that you are in compliance with OSHA.

Successful companies and employers do not guess at regulatory compliance. They make certain they are in compliance at all times or at least they are making strong efforts to be in compliance. It is no different when it comes to health and safety training. The training received by employees is only as good as the instruction. Unfortunately, some people believe that a certificate is a certificate and they are in compliance. This is not always the case and companies pay huge fines for training deficiencies.

An effective training program:

- Develops a strong safety culture
- Heightens employee safety by helping employees protect themselves
- Improves a company's effectiveness, efficiency, and productivity
- Increases employee skills
- May prevent regulatory sanctions
- Aids in ensuring safe and secure shipments of hazardous materials
- Reduces likelihood of catastrophic events
- Provides employees with understanding of why compliance and safety are necessary

Training for Marine Oil Spills

OSHA has issued special directives or guidance documents with respect to marine oil spill cleanup. According to these documents, some of the HAZWOPER training requirements maybe be lessened. For example, a worker retrieving tar balls on a beach may not need the 40 hour course. The beach workers could possibly receive a specialized 8 hour course and be in compliance with OSHA. All of this depends upon the OSHA permissible exposure levels (PELs) of the constituents in the oil.
